

# MICHAEL OGUNDIPE

---

**AI Engineer | Senior Mobile Software Engineer**

Ogundipeibukun51@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

AI Engineer and software engineering professional experienced in designing, building, and shipping production software and AI-powered applications. Strong background in software architecture, API integration, testing, deployment, debugging, and end-to-end product development, with hands-on experience building LLM-powered applications, RAG pipelines, NLP solutions, and AI-enabled user experiences.

## AI ENGINEERING PROJECTS

### Watchtower

AI Engineering Project | Python, FastAPI, LangGraph, OpenAI, PostgreSQL, Flutter

**GitHub:** <https://github.com/Michael-Ogundipe/watch-tower>

- Building an AI-powered trading assistant that continuously analyzes live market data across five timeframes (H4–M1) to detect trend, structure breaks (BOS/CHoCH), liquidity sweeps, order blocks, and fair value gaps.
- Designing a confluence engine that combines technical signals into a directional bias and feeds structured market state into an LLM-based reasoning layer for setup validation and human-readable trade rationale.
- Modeling the trading domain end-to-end (Market, TimeFrame, Candle, OrderBlock, FairValueGap, TradeSetup, Confluence, and more) as part of a FastAPI/PostgreSQL backend architecture with Redis caching and Celery-based processing.
- Building a real-time Flutter dashboard (Riverpod, Syncfusion Charts) to surface multi-timeframe market state, directional bias, and trade signals, with planned multi-channel alerting via Telegram, Discord, and push notifications.
- Engineering the system toward containerized deployment with Docker and GitHub Actions CI/CD, with planned historical replay and forward/paper testing for reliability and latency validation.

## Discord AI Chatbot

LLM Application | Python | Discord API | Ollama

- Built a conversational AI application integrating Discord with locally hosted language models through Ollama.
- Implemented message-handling workflows that capture user prompts, invoke local LLM inference, and return generated responses through Discord.
- Integrated a local AI inference environment into a user-facing application, demonstrating practical LLM application development.

## PROFESSIONAL EXPERIENCE

### Senior Mobile AI Engineer

Converge Medicare Services — Remote | Jul 2025 – Jun 2026

- Developed and integrated AI-powered features using LLMs, NLP, and Retrieval-Augmented Generation (RAG), enabling contextual information retrieval and conversational user experiences.
- Designed and implemented RAG pipelines that combined domain-specific data with LLM reasoning to improve the relevance and consistency of AI-generated responses.
- Integrated AI inference services and REST APIs into production Flutter applications, connecting mobile interfaces with backend and AI processing workflows.
- Applied prompt engineering and structured context management to improve AI response quality, while investigating retrieval, prompting, and application-level issues.
- Led major product initiatives and contributed to production stability, helping increase the Google Play Store rating from 4.0 to 4.3.

### Flutter Developer

HeyFlutter — Germany | Remote | May 2023 – Dec 2024

- Built and maintained software projects and educational applications using Flutter.
- Created 10+ comprehensive source-code projects for Flutter tutorials, supporting thousands of developers.
- Applied software architecture, debugging, testing, and performance optimization practices across projects.

## Flutter Developer

AmorServ LLC — USA | Remote | Feb 2023 – May 2023

- Built a high-performance search algorithm operating across 77,000+ technician records, improving operational efficiency by approximately 25%.
- Reduced application loading times by approximately 30% through performance optimization.
- Built a cross-platform application supporting Android, iOS, and Web.

## AI & TECHNICAL SKILLS

**AI:** LLM Applications · RAG (Retrieval-Augmented Generation) · NLP · Prompt Engineering · AI Agents · Model Integration

**AI Tools & Frameworks:** OpenAI API, LangGraph, Ollama

**Backend & Data:** Python · FastAPI · PostgreSQL · Redis · Celery · REST APIs

**Mobile & Frontend:** Flutter · Dart · Riverpod · Firebase · Clean Architecture

**DevOps & Tools:** Docker · GitHub Actions · CI/CD · Automated Testing · Git

## EDUCATION

MBA, Specialization in Artificial Intelligence — Nexford University | In View 2026

B.Sc. Industrial Mathematics (Computer Option) — University of Lagos | 2023
